Intelligence in Motion

## Key Features

### FULL SHIFT BATTERY LIFE

Ensuring your camera lasts a whole shift is critical to ensuring recording capability.

### HD LIVE STREAMING

The original innovators in mobile live streaming now deliver enhanced HD capability with Matrix2, offering the leading technology in body worn real-time intelligence.

### ENCRYPTION & SECURITY

Ensures your data is protected on the camera and in transit with gold standard encryption AES256, signed digital certificates, secure socket layer technology.

### ON-BOARD GPS

Knowledge is power: on-board GPS allows you to access the precise location of recording, including the speed they're moving and latitude and longitude, ensuring all details are on-hand for your records.

### IP67 RATED

Dust resistant and waterproof up to 1 metre and for 30 minutes; the Matrix2 was designed with durability in mind, for any environment.

### ULTRA LONG STANDBY

Power up and record in 2 seconds with a single button press, with up to 100 hours in ultra-long standby mode.

### ULTRA-LOW LIGHT CAPTURE

The Matrix's 140-degree lens ensures that what you see is what you get. Superior low-light performance and automatic infra-red illumination records video in complete darkness.

### SIMPLE BUTTON OPERATION

Refined design has made it simple for you to operate the Matrix2. There's one button for power, one for record and one for photos. Easy operation for high pressure situations.

### PRE-RECORDING

The pre-record function enables you to capture video even before you initiate recording.

### STEALTH MODE

Dangerous situations demand that operators keep a low profile. Stealth mode disables all lights and sounds so that you don't attract any unwanted attention.

### COMPACT & LIGHT

Weighing 140g and about the size of a card deck, the Matrix2 is lighter than your average modern mobile phone.

### DROP-IN DOCK

Time is of the essence, the Drop-In Dock allows you to rapidly offload the recorded content to secure storage at the end of a shift.
